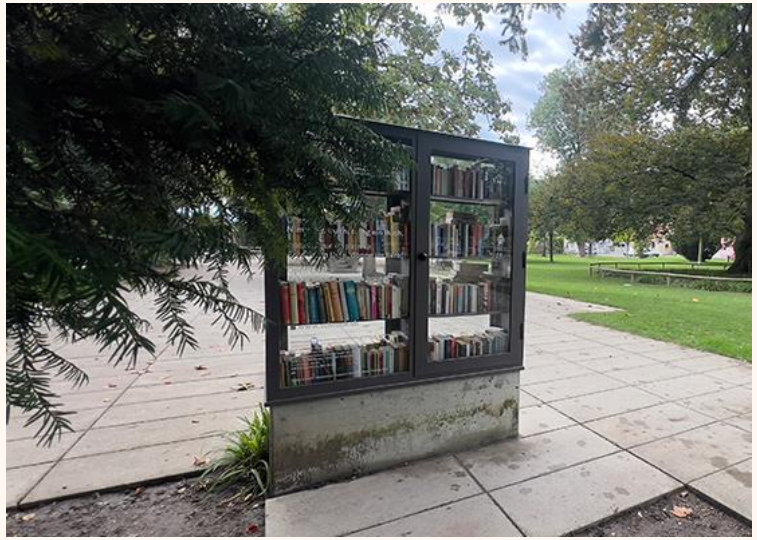
# Community in a Box

*A community book-sharing platform*

# The Book Boxes



# Box Locations

# Team

*The people behind the project*

# Idea

- Digital Layer
- Track Books
- Community Driven
- Optional
- Relies on voluntary «Maintainers»
- Gamification

# Key Features

## Add Books

Place your books on a community shelf for others to discover

## Borrow Book

Borrow a book from a shelf

## List Books

Browse the books currently registered in a shelf and see what is available at each location

## Several Minigames

Encourage users to scan and confirm books regularly, helping to keep the shelf synchronized

## Barcode Scan (ISBN)

Books can be identified by scanning their ISBN

## QR-Code integration

QR codes create a direct bridge between the physical shelf and its digital representation
